

Anfaz Edakkavil Aboobakar

Software Engineer | AI & Data

+353 892007825 | anfaze98@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Cork, Ireland (Open to relocate)

PROFILE

Software Engineer with nearly 4 years of experience developing and supporting enterprise insurance solutions using XQuery, Java, SQL, XML, Microsoft SQL Server, and MongoDB. Skilled in document-generation systems, query optimisation, production deployments, Agile delivery, and cross-functional collaboration. MSc graduate in Artificial Intelligence with hands-on experience in machine learning, deep learning, natural language processing, big data processing, transformer models, multimodal AI, and explainable AI.

EDUCATION

Master of Science in Artificial Intelligence (78.6%) Sept.2025 – Sept.2026

Munster Technological University

Cork, Ireland

Module: Practical Machine Learning, Deep Learning, Natural Language Processing, Big Data Processing, Knowledge Representation and Reasoning, Decision Analytics, Metaheuristic Optimisation, and Software Agility

Bachelor of Engineering in Computer Science (7.74 CGPA) Jul. 2017 – Jun 2021

Sahyadri College of Engineering and Management

Mangalore, India

Module: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Software Testing, Web Technologies, and Python Programming

EXPERIENCE

Technology Analyst | Promoted three times during tenure Aug. 2021 – Jul. 2025

Infosys Limited

Bangalore, India

- Developed and maintained document-generation components for the Aetna insurance platform on Majesco Cloud Insurer, primarily using XQuery, with supporting Java and SQL development.
- Designed, enhanced, and supported more than 30 insurance document templates, XML transformations, layouts, and data mappings within the Document-as-a-Service (DaaS) application.
- Optimized XQuery logic and database queries across Microsoft SQL Server and MongoDB, improving query execution and reducing insurance document-generation time.
- Supported monthly production releases using SVN checkout and Majesco DaaS deployment processes, including release validation, troubleshooting, and post-deployment support.
- Delivered enhancements across agent onboarding, group setup and enrolment, claims upgrade merges, and insurance billing scenarios while supporting regulatory and product changes.
- Collaborated with business analysts, QA engineers, frontend developers, and integration teams within a 20-member Agile team, while serving as one of two dedicated DaaS engineers and mentoring junior team members.

Team Member (Part-time) Sep. 2025 – Present

Oak Fire Pizza

Cork, Ireland

- Delivered high-quality customer service in a fast-paced environment while efficiently supporting high-volume kitchen operations.
- Developed strong teamwork, communication, time-management, and multitasking skills while working effectively under pressure.

PROJECTS

Multimodal Depression and Positive Affect Detection | *PyTorch, Whisper, Captum, Transformers, Scikit-learn*

- Designed and developed an end-to-end multimodal AI system combining XLM-RoBERTa text embeddings, audio-visual features, and MentalRoBERTa positive-affect representations for depression detection.
- Built preprocessing and training pipelines across Reddit posts, YouTube vlog transcripts, acoustic features, and facial-landmark data, including Whisper-based transcription and class-imbalance handling.
- Integrated three independently trained encoders through projection layers and a neural fusion classifier, achieving an AUROC of 0.9867 and an F1-score of 0.9508, with Integrated Gradients used for token-level explainability.

Stock Market Analysis and Price Prediction | *Python, Django, Machine Learning, Web Scraping*

- Developed a Django web application that collected stock-market information from online sources and presented historical trends through interactive visualisations.
- Built and integrated a machine-learning pipeline to generate stock-price predictions from historical market data.

Parking Management System | *Java, MySQL, Spring Boot*

- Built a full-stack parking management system as a Spring Boot web application for managing parking-space allocation, customer/vehicle records, bookings, and payments against a shared MySQL database.
- Implemented database operations, user authentication, availability tracking, and reporting features to simplify day-to-day parking management.

TECHNICAL SKILLS

Languages: Java, Python, SQL, XQuery, TypeScript, C, C++, HTML, CSS, XML

Frameworks: Angular, Django, Spring Boot, PyTorch, Bootstrap, PySpark

Developer Tools: Postman, VS Code, NetBeans, Altova XMLSpy, Google Colab, Ollama, Microsoft SQL Server, MySQL, MongoDB

Libraries: Hugging Face Transformers, scikit-learn, pandas, NumPy, Matplotlib, Captum, OpenAI Whisper

CERTIFICATIONS

Infosys Certified Database and SQL Professional (Jul 24')

Infosys Certified Python Associate (May 24')

Infosys Certified Agile Developer (Apr 22')
